

LETTER OF REFERENCE

Ref: BE/be/37447

To whom it may concern

Dear Sirs

LIBERTY CENTER MALL BUCHAREST MECHANICAL AND ELECTRICAL INSTALLATION WORKS

Liberty Center Mall consists of 2 levels of basement car parking, basement access and service yard, and 3 levels of mixed retail accommodation including a food court, ice skating rink and 3D digital cinema.

MET Engineering SA provided a complete "design-build and turn-key" package of mechanical and electrical installations including detailed design, supply and installation of all plant and equipment, and testing and commissioning.

Mivan-Kier Joint Venture enjoyed excellent collaboration with MET throughout the execution period and the pro-active approach of their management allowed us to incorporate some significant client variations (such as the M&E installation to the cinema) within their original subcontract duration. Liberty Mall remains the first major retail project in Romania to open on its original contract completion date.

We have pleasure in recommending the services of MET Engineering SA for projects of a similar nature in Romania.

Yours faithfully
For and on behalf of Mivan-Kier Joint Venture

Ben Edwards
Commercial Manager
