

To whom it may concern

Raaba, 20.12.2012

This letter is to certify that the construction company, Synergy Construct S.R.L., successfully completed their works under the terms of our contract for Turceni Thermal Power Plant Flue Gas Desulfurization Project, providing the civil works and building services.

Synergy Construct S.R.L., as our chosen contractor, has executed with professionalism whole Reinforced Concrete works as mentioned below,

2 800	m2 of Sheet piling works
3 350	meters of micro piling works ($\phi 25$)
17 000	meters of CFA piling works ($\phi 63$, $\phi 88$)
42 000	m2 of formworks
37 000	m3 of concrete works
4 500	tons of reinforcement works (exc. piling works)

as well as the architectural finishing and low current and mechanical installations

4 600	m2 Epoxy coating
650	m2 of joinery works
24 500	m2 of façade and roof cladding works

And street works and infrastructural works;

15 500	m2 of asphalt area
7 800	meters of infrastructural pipes (hydrant, potable, rain, sewage)
3	pcs of septic tank
11	pcs of special manholes (25 m3) with pumps

We, Andritz Energy & Environment GmbH, would like to state that Synergy Construct S.R.L. team works with dedication and had a good coordination with our part. Their performance, constructive and helpful approach during the project allows us to recommend them with confidence as a General Contractor.
